

# Castlewood School WIN (What I Need)

## Intent

Initially we have introduced this to Lower School (years 2-8)

Planned time in the afternoon for time to be spent working towards targets of Section E and F of the pupils' EHCP as well as working towards targets that Motional (<https://motional.io/>) brings to our attention after assessing them and snapshotting them at the previously mentioned tools. The idea is that these will include practical and therapeutic play-based activities that help to develop the children's social and emotional mental health in order for them to regulate themselves better to become better learners and therefore go on to build confidence and self-belief enabling them to be successful in their adult lives.

## Implementation

- 2 lessons per week
- Activities set from Motional
- Activities set from EHCP targets
- Resources to be ordered to assisted with the implementation of this
- Record on Provision Map

## Impact

- The impact of this will be shown by RPI decreases throughout lower school compared to previous year.
- Progress will also be shown when taking a new snapshot of the child on Motional
- Children engaging with lessons
- Children being able to regulate themselves independently with less need for adult support in times of crisis

During WIN, the children had run out of water on their expedition. They had to work as a team to collect water and transport to it their base camp. The children showed excellent teamwork, communication and resilience.
